

Electrical Product Safety Conference 2026 - Regulation, Responsibility, Risk
Thursday 26 November, Church House, London

09.00 Registration and networking

Welcome and opening remarks

Susannah Streeter, Broadcaster and Analyst

Lesley Rudd, Chief Executive, Electrical Safety First

Opening keynote

Regulatory reform

Stay ahead of product safety reform with practical insights on policy, compliance and enforcement - get your organisation is ready for what's next.

Impact of technology on safety

Discover how emerging technologies are transforming product safety from design to real-world use - so you can anticipate new risks, responsibilities and opportunities.

Safety in circularity

As products are reused, repaired and recirculated, safety questions grow. Explore how to build trust, clarify responsibilities and protect consumers across long and complex product lifecycles.

Safety Innovation Award

Winner announcement

Hazard-based approach to high-risk products

Focus on what matters when risk is highest. Discover how hazard and risk-based thinking can support smarter decisions, clearer accountability and stronger protection—while enabling innovation.

Innovation vs Reality

A look at what really happens when a great idea meets UK electrical safety requirements

16.30 Drinks reception
